MulVAL Stackelberg benchmark summary (optimal; relative gap range: 0-0)
(a) End-to-end runtime
wall time (s, log)
number of goals
graph
1k
10k
100k
(b) Effective graph size
vertices after target closure (log)
number of goals
(c) Runtime decomposition
seconds (stacked, log)
read csv
target closure
build mip
optimize
(d) Solver effort normalized by closure size
optimize time / reduced vertex (s, log)
number of goals
